PROFESSIONAL SUMMARY

Computer Science graduate (AI specialization, GPA 4.75/5.00) focused on business intelligence and data analytics. Experienced in building interactive Power BI dashboards and data models, and using Power Query, DAX, and SQL to transform raw data into actionable insights. Strong foundation in data modeling, ETL, and reporting, seeking to develop data and analytics products that drive organizational objectives.

PROFESSIONAL EXPERIENCE

Invoice Specialist | Algihaz | June 2025 – Present

- Design and maintain Power BI dashboards covering invoice status, aging analysis, financial KPIs, payment trends, and vendor performance, enabling real-time visibility for finance and management teams.
- Build automated data pipelines in Power Query to clean, transform, and consolidate invoice data from multiple sources, and automate report refresh workflows in Power BI and Excel.
- Present analytical findings and dashboard insights to managers and stakeholders, translating complex data into clear recommendations that support decision-making.

Data Science Intern | National Center for Metrology (NCM) | January 2024 – March 2024

- Analyzed 10,000+ aviation message datasets (METAR/SPECI) using Python and Excel, developing scripts and automated Excel reports to classify data and improve operational reporting.

EDUCATION

Bachelor of Science in Computer Science (Artificial Intelligence)
University of Jeddah | 2019 – 2024 | GPA: 4.75 / 5.00

- Relevant Coursework: Data Analysis, Machine Learning, Statistics, Database Systems (SQL), Data Structures, Computer Vision, Natural Language Processing.
- Graduated with distinction; strong foundation in data analysis, statistical modeling, and machine learning.

TECHNICAL SKILLS

Business Intelligence: Power BI (Dashboards, DAX, Data Modeling, Star Schema), Power Query (ETL, M Language), Data Visualization, KPI Reporting
Querying & Databases: SQL, Data Modeling, Query Development
Programming & Analysis: Python (Pandas, NumPy), Advanced Excel (PivotTables, Power Query), Data Cleaning, EDA
Tools & Practices: Microsoft Office Suite, Git / Version Control, Reporting Automation
Soft Skills: Analytical Thinking, Problem-Solving, Business Communication, Attention to Detail, Collaboration

KEY PROJECTS

Saudi Banking Credit Dashboard | Power BI, Power Query, DAX | GitHub

- Built an interactive 4-page dashboard analyzing 28 years of Saudi Central Bank (SAMA) data across 17 economic sectors, mortgages, and consumer lending.
- Designed a star-schema data model with 20+ DAX measures, including time-intelligence calculations (YoY growth, peak detection) and dynamic auto-updating insights.

HR Analytics – Employee Attrition Dashboard | Power BI, Power Query, DAX | GitHub

- Analyzed attrition across 1,470 employees, finding overtime workers leave at nearly 3x the rate of others (30.5% vs 10.4%).
- Built dynamic measures segmenting attrition by department, age, income, and tenure, with data-quality validation during QA.

Auto-Najm – Computer Vision for Traffic Management (Senior Project) | Python, YOLO, TensorFlow

- Developed an autonomous traffic accident management system using computer vision and deep learning, achieving 88% real-time detection accuracy and 85% classification accuracy.

AWARDS & RECOGNITION

- First Place – Best AI Project, Creativity and Innovation Exhibition, University of Jeddah; Third Place (of 40,000+) – Absher Challenge 2024, Ministry of Interior and SDAIA.

LANGUAGES

Arabic (Native) | English (Professional Working Proficiency)
